PREFATORY NOTE

This, the thirteenth volume of THE ENGLISH CATALOGUE OF BOOKS, records works published in Great Britain and Ireland during the five years, 1931-1935. During that period, 76,282 works have been published, or nearly 6,000 more than were issued during the previous quinquennium. As each work is catalogued under its author's name, and also under its title and subject where necessary, it is estimated that this volume contains over 160,000 entries.

METHOD OF ARRANGEMENT.

The main entry for each work, supplying full particulars as to author, title, size, price, publisher, month and year of publication, etc., is arranged alphabetically under the author's surname (if known) in **heavy** type. (The main entry for an anonymous work appears under the first word of its title.)

As an index to these main records, entries are made under the titles of works, commencing with the most important words (which usually indicate the subjects dealt with by the books), or with the first words of titles (usually in the case of fiction and other imaginative works); and, in addition, frequent entries are made under independent subject headings. Entries are also made under the names of joint-authors, and important editors, translators and illustrators. In all these index-entries, the names or words printed in *italic* refer to the main entries under which the full particulars regarding publishers and prices and other bibliographical details will be found. Main and index entries are in one alphabetical sequence, making it easy to find any book of which the author, title or subject is known.

It should be noted, in using a large alphabetical sequence such as this, that where they are the same in spelling, names of persons precede names of places, things or titles. Thus "London (Jack)" precedes "London and its environs"; and "More (Sir Thomas)" precedes "More about me." Writers with compound names are entered under the first parts of the names, e.g., "**Quiller-Couch**" (Sir Arthur T.), with references from the last parts of the names, e.g., "Couch (Sir Arthur T. Quiller-). See *Quiller-Couch*."

Some authors alter the forms of their names, or change their names, and it is difficult to keep track of such variations in a work of reference compiled periodically. Every effort has been made to collect and link up the works of such authors under the forms of names most likely to be referred to by users of this volume, and references from variants of names have been included freely. The same applies to the transliterated names of foreign authors (e.g., Chekhov or Tchekhov, etc.).

Authors consistently using pseudonyms are entered under those pseudonyms, with references from their real names when known. An author who has published works under his real name and also under a pseudonym is entered under his real name with a reference from the pseudonym.

A note regarding the subject entries may be useful. Books are indexed under the names of the *specific subjects* with which they deal. For example, all books on gardening are not collected under the heading "Gardening." Books on gardening in general are entered there; but works dealing with special branches of the subject (e.g., "Carnations," "Greenhouse," etc.) will be found under the names of those specific parts of the subject. This method of indexing makes it possible for a book on any special topic to be traced easily and quickly, and at the same time limits the alphabetical sequence to reasonable dimensions.

The system of added subject-entries is of great value to the person seeking not particular books, but books on a particular topic. An author, for example, has published an important book on the history of Chile under the title "The Dawn." The book is entered in the usual way under the author's name and under the title; but it is also entered under the heading of "Chile"—with the result that THE ENGLISH CATALOGUE OF BOOKS is the only published work of reference of its kind that enables an enquirer for books on Chile to find that particular work without prolonged research. There are many thousands of such subject entries in the present volume.

Lastly, in using so large an alphabetical sequence, it should be remembered that names and titles phonetically alike may be widely varied in their spelling. "Laurence," "Lawrance" and "Lawrence" sound alike, but several pages of entries separate them.

OTHER INFORMATION

The publications of learned Societies are recorded in an Appendix.

The names and addresses of the Publishers of Great Britain and Ireland will be found at the end of the volume. The telegraphic and cable addresses have been added when known.

A BRIEF STATISTICAL ANALYSIS OF BOOKS PUBLISHED DURING 1931-1935

The following table shows the number of books recorded as having been published during the five years, 1931-1935:—

					New Books.	New Editions.	Totals.
1931	10,563	4,125	14,688
1932	10,514	4,320	14,834
1933	11,082	3,940	15,022
1934	11,196	4,432	15,628
1935	11,239	4,871	16,110
Totals					54,594	21,688	76,282

During the previous five years, 1926-1930, the total recorded was 70,487.

The detailed analyses of each year's publishing will be found in the annual volumes of THE ENGLISH CATALOGUE OF BOOKS for the respective years. The combined five-years' table included here presents much interesting information in a condensed form, and includes the totals for the previous five-yearly period for comparative purposes.

A word or two of explanation are necessary for the proper understanding of the figures given in the analytical table, particularly if any attempt is made to compare them with those of other countries. The arrangement of the table is

according to the classification adopted by the International Congress of Librarians at Brussels in 1910, and this enables British publishing to be compared with that of nearly every other country issuing statistics. The difficulty of such comparison arises out of the different methods of "counting heads." In our table, each complete publication is counted as one, whether it is in one or more volumes. Serials that appear later as a collected volume are counted as an ordinary book on the appearance of that volume. All publications of 48 pages or less are counted as "pamphlets."

A great deal of printed matter does not appear in these tables at all. Newspapers and periodicals (except such of the latter as are issued in volume form) are omitted, as are great numbers of official reports and documents issued by municipalities and other public bodies and institutions, musical texts, and ephemeral pamphlets. All Government publications are not included, because many hundreds of them are merely continuations or business papers that are not publications in the true sense ; but all the important Government publications are included.

The object of the table is to represent the book publishing activity of the British Islands. It would be easy to reach an enormous total by including such literary protozoa as is indicated above, but such a total would cease to represent British book publishing. In some countries such matter is included, and care should be taken to ascertain where this is done before international comparisons are made.

The compulsory registration of publications is not a condition of copyright in the British Isles, and in spite of the large number of books recorded here it is to be expected that some have been omitted. The Editor will be glad to receive particulars of such omissions, or corrections of errors, for inclusion in subsequent volumes. Such information should be addressed to the Editor of **THE ENGLISH CATALOGUE OF BOOKS**, "Publishers' Circular" Office, 56-58, Whitcomb Street, Leicester Square, London, W.C.2.

Hearty thanks are due to the many publishers and booksellers, librarians, secretaries, authors and bibliographers who have assisted in making this record more correct and comprehensive than it would have been otherwise.

J. D. S.

1936.
